

3D Printing

The library provides 3D printing services to the public. Due to the sensitive nature of the equipment, library staff must operate the 3D printer. Check with library staff for current available printing volume and materials.

All library policies are in effect when using the 3D Printing service. The library reserves the right to refuse a request to print an object if, in its judgment, the item is:

- Inappropriate, or in violation of any library policies
- In violation of copyright restrictions, or other applicable laws.

Charges for 3D printing are based on the weight of the printed object, as measured by the library's scale. Materials costs are as follows:

| Filament | Cost |
|-----------------|---------------|
| Standard colors | \$0.10 / gram |
| Premium colors | \$0.15 / gram |
